

Environmental Policy Statement

Mansell Building Solutions Ltd are committed to reducing our overall environmental impact and continually improving our environmental performance.

We operate a framework called The Mansell Way. This framework clarifies our purpose, values and defining behaviours. It was built by the people who live it every-day and is our guide to Mansell Building Solutions values and priorities.

We will give equal regard to all aspects of our business, health and safety, the environment, production, quality and cost. We will comply with legislation, as a minimum, and strive for continuous improvement of our performance.

The company is committed to:

- Supporting/complying with current environmental legislation and best practice.
- The reduction in waste sent to landfill.
- Minimizing packaging waste and reusing or recycling where practicable.
- Operating and maintaining company vehicles with due regard to emissions and, as far as reasonably practicable, procuring electric or hybrid vehicles.
- As far as possible purchasing products and services from sustainable sources such as FSC certified companies and encouraging others to do the same.
- Assessing the environmental impact of any new processes or products.
- Ensuring that all employees understand our environmental policy and conform to the high standards it requires.
- Addressing complaints about any breach of our Environmental Policy promptly and to the satisfaction of all concerned.

Directors will set environmental objectives annually which will be communicated to all personnel through Monthly SHEQ Bulletins. Objectives will be reviewed regularly by the Business Support Director and quarterly at management review meetings.

Managers must devise and implement site Waste Management Plans and supervisors must ensure that workers are briefed and consulted and comply with the requirements of those plans. Managers are ultimately responsible for bringing this policy to the notice of all employees and others who may be affected by it.

Employees must adhere to the site-specific Waste Management Plans and strive to reduce the total construction waste generated on site. Employees are also responsible for reporting any environmental accidents/incidents or hazards to the relevant persons/MBS management.

The company has appointed SHEQ Consultant, Vicky Cabo who will provide monitoring, advice, training and instruction. They will carry out audits and inspections and bring to the attention any Non-Conformance observed.

This policy will be reviewed annually during management review meetings of our ISO14001:2015 compliant management system.

Angela Mansell
Managing Director
