

Quality Policy Statement

Mansell Building Solutions Ltd. will ensure that our construction services meet our clients' expectations, our own high standards and comply with all relevant regulations.

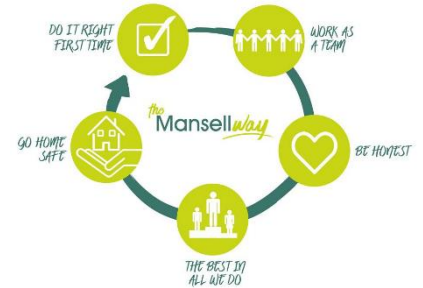

We operate a framework called The Mansell Way. This framework clarifies our purpose, values and defining behaviours. It was built by the people who live it every-day and is our guide to Mansell Building Solutions values and priorities.

We will give equal regard to all aspects of our business, health and safety, the environment, production, quality and cost. We will comply with legislation, as a minimum, and strive for continuous improvement of our performance.

In defining our values, we are able to drive decisions and in turn, deliver success. Specific quality objectives will be set and reviewed through our management review process. To help achieve these, we will maintain a quality system that meets BS EN ISO 9001:2015 - "Quality Management Systems – Requirements".

We must strive to continually improve our performance by regularly evaluating our construction contracts and identifying actions to ensure that our objectives are achieved and that problems are prevented.

This policy will be reviewed annually during management review meetings of our ISO 9001:2015 quality management system.

Angela Mansell
Managing Director
